

CHRISTABEL CHRISTOPHER

christabellachristopher60@gmail.com | linkedin.com/in/christabel-christopher | github.com/bellacabcode | Nigeria

EDUCATION

Bachelor of Science, Computer Science Graduated

Ambrose Alli University Nigeria

- Final Year Project: **E-Voting System** — designed and built a full digital voting platform with authentication and result tabulation

Associate Degree in Computer Science (In Progress) Expected 2026

University of the People Online

- Transitioning into Bachelor's programme; focus on software engineering fundamentals and applied computing

EXPERIENCE

Co-Founder & Research Head 2024 – Present

Move Logistics Nigeria

- Co-founded Move Logistics and established the **research division** to drive product strategy and technology decisions
- Led a research team investigating logistics optimisation, last-mile delivery challenges, and digital solutions for emerging markets
- Applied **AI-powered research workflows and advanced prompt engineering** to synthesise market data, competitor analysis, and user feedback into actionable product roadmaps — significantly reducing manual research time
- Collaborated cross-functionally with engineering and operations to align research findings with development priorities

Front-End Developer 2025 – Present

Duo Connects Remote

- Built and maintained **responsive web interfaces** for a digital connection platform serving a distributed user base
- Implemented UI components using **HTML, CSS, and JavaScript**, ensuring cross-device compatibility and accessibility
- Collaborated with product and design teams to translate wireframes into functional, polished front-end experiences
- Integrated **AI-assisted development tools and structured prompt engineering** to accelerate iteration cycles, reduce debugging time, and generate higher-quality code output

Front-End Developer 2024 – Present

Freelance / Project-Based Remote

- Delivered multiple client web projects end-to-end, from scoping through deployment, using **HTML, CSS, and JavaScript**
- Leveraged **Advanced prompt engineering and AI tooling** — including formal training in LLM interaction and agentic workflows — to automate repetitive tasks, accelerate development timelines, and deliver polished outputs faster
- Conducted debugging, performance optimisation, and UX reviews across projects to improve end-user experience

Social Media Manager 2026 – Present

Cosmo Studio Remote

- Managed social media pages, content calendars, and audience engagement strategies across **Instagram, TikTok, and LinkedIn**
- Utilised **Meta Business Suite** for page setup, ad management, and performance analytics
- Developed brand voice guidelines and content templates that improved posting consistency and audience growth

PROJECTS

E-Voting System | HTML, CSS, JavaScript Final Year Project

- Designed and developed a secure digital voting platform with user authentication, ballot management, and real-time result tabulation
- Built responsive UI ensuring accessibility across desktop and mobile devices

SKILLS

Languages & Core: HTML, CSS, JavaScript, Markdown

Frameworks / Tools: GitHub, VS Code, Canva, Meta Business Suite

AI & Productivity: Advanced Prompt Engineering, AI-Assisted Development, LLM Tool Use & Function Calling, Agentic Workflow Design, ChatGPT, Claude, Copilot, Google Veo, Leonardo.ai

Research & Strategy: Market Research, Product Strategy, Competitive Analysis, Technical Writing

Digital & Social: Social Media Management, Digital Branding, Content Strategy, Instagram, TikTok, LinkedIn
Soft Skills: Critical Thinking, Problem Solving, Adaptability, Team Collaboration, Fast Learning, Communication
Languages (Human): English (Fluent)

ADDITIONAL

Interests: Web Development, Artificial Intelligence, UI/UX Design, Tech Innovation, Digital Branding, Logistics Technology
Open to: Front-end development roles, research positions, and digital strategy engagements
remote or international
